

Figure 1. A schematic diagram illustrating the experimental design. The figure shows two parallel horizontal timelines representing the duration of the study. The top timeline is labeled "Participant 1" and the bottom timeline is labeled "Participant 2". Both timelines start at a point labeled "Baseline". Following the baseline, there are three distinct phases indicated by brackets above each timeline. Phase 1 is labeled "Phase 1" and Phase 2 is labeled "Phase 2". Between Phase 1 and Phase 2, there is a period labeled "Washout". After Phase 2, there is a final period labeled "Post-test". The timelines show various data points and markers corresponding to these phases and the washout period.
